

To: FCC Committee: I ask that you oppose NAB's petition 04-160 to restrict satellite radio's service offerings to the public as represented in House Bill HR 4026. Satellite radio service has truly improved on the information received from public radio in the six months I have subscribed. The variety of stations and quality of reception particularly in my travels as a salesman in remote portions of NH far exceeds the public radio programming. There is no sense in restricting technology and the benefits consumers receive and this Bill does just that. Let competition not regulation determine what the consumer receives!

Sincerely,
Leo Bruyette
